Our Mission

DCB provides a platform to generate distinctive audit-proof carbon credits where market-leading companies select offsets aligned to their ESG strategies.

Creating global impact
through localized offsets

The Problem

Carbon Offset Quality

A threat to trust and transparency.

01

Offset Confidence

Low confidence in carbon offset impact.

02

Reputation and Fraud Risk

High risks associated with low quality offsets

03

Commoditization of Credits

Lack of alignment with corporate carbon strategy

The Solution

Digital
Carbon
Bank

Carbon+ Platform

- CO2e Tokenization on Web4.0 Blockchain
Data integrity and immutability

- Renowned Validation/Verification Standards
Transparency of validation protocols

- Project/Location Specific Offsets

- **Recognition of uniqueness of credits to match corporate strategy**

The DCB Advantage

1 Recognition of carbon offsets as unique with individual advantages.

2 Accessible verification/validation protocols for purchaser scrutiny.

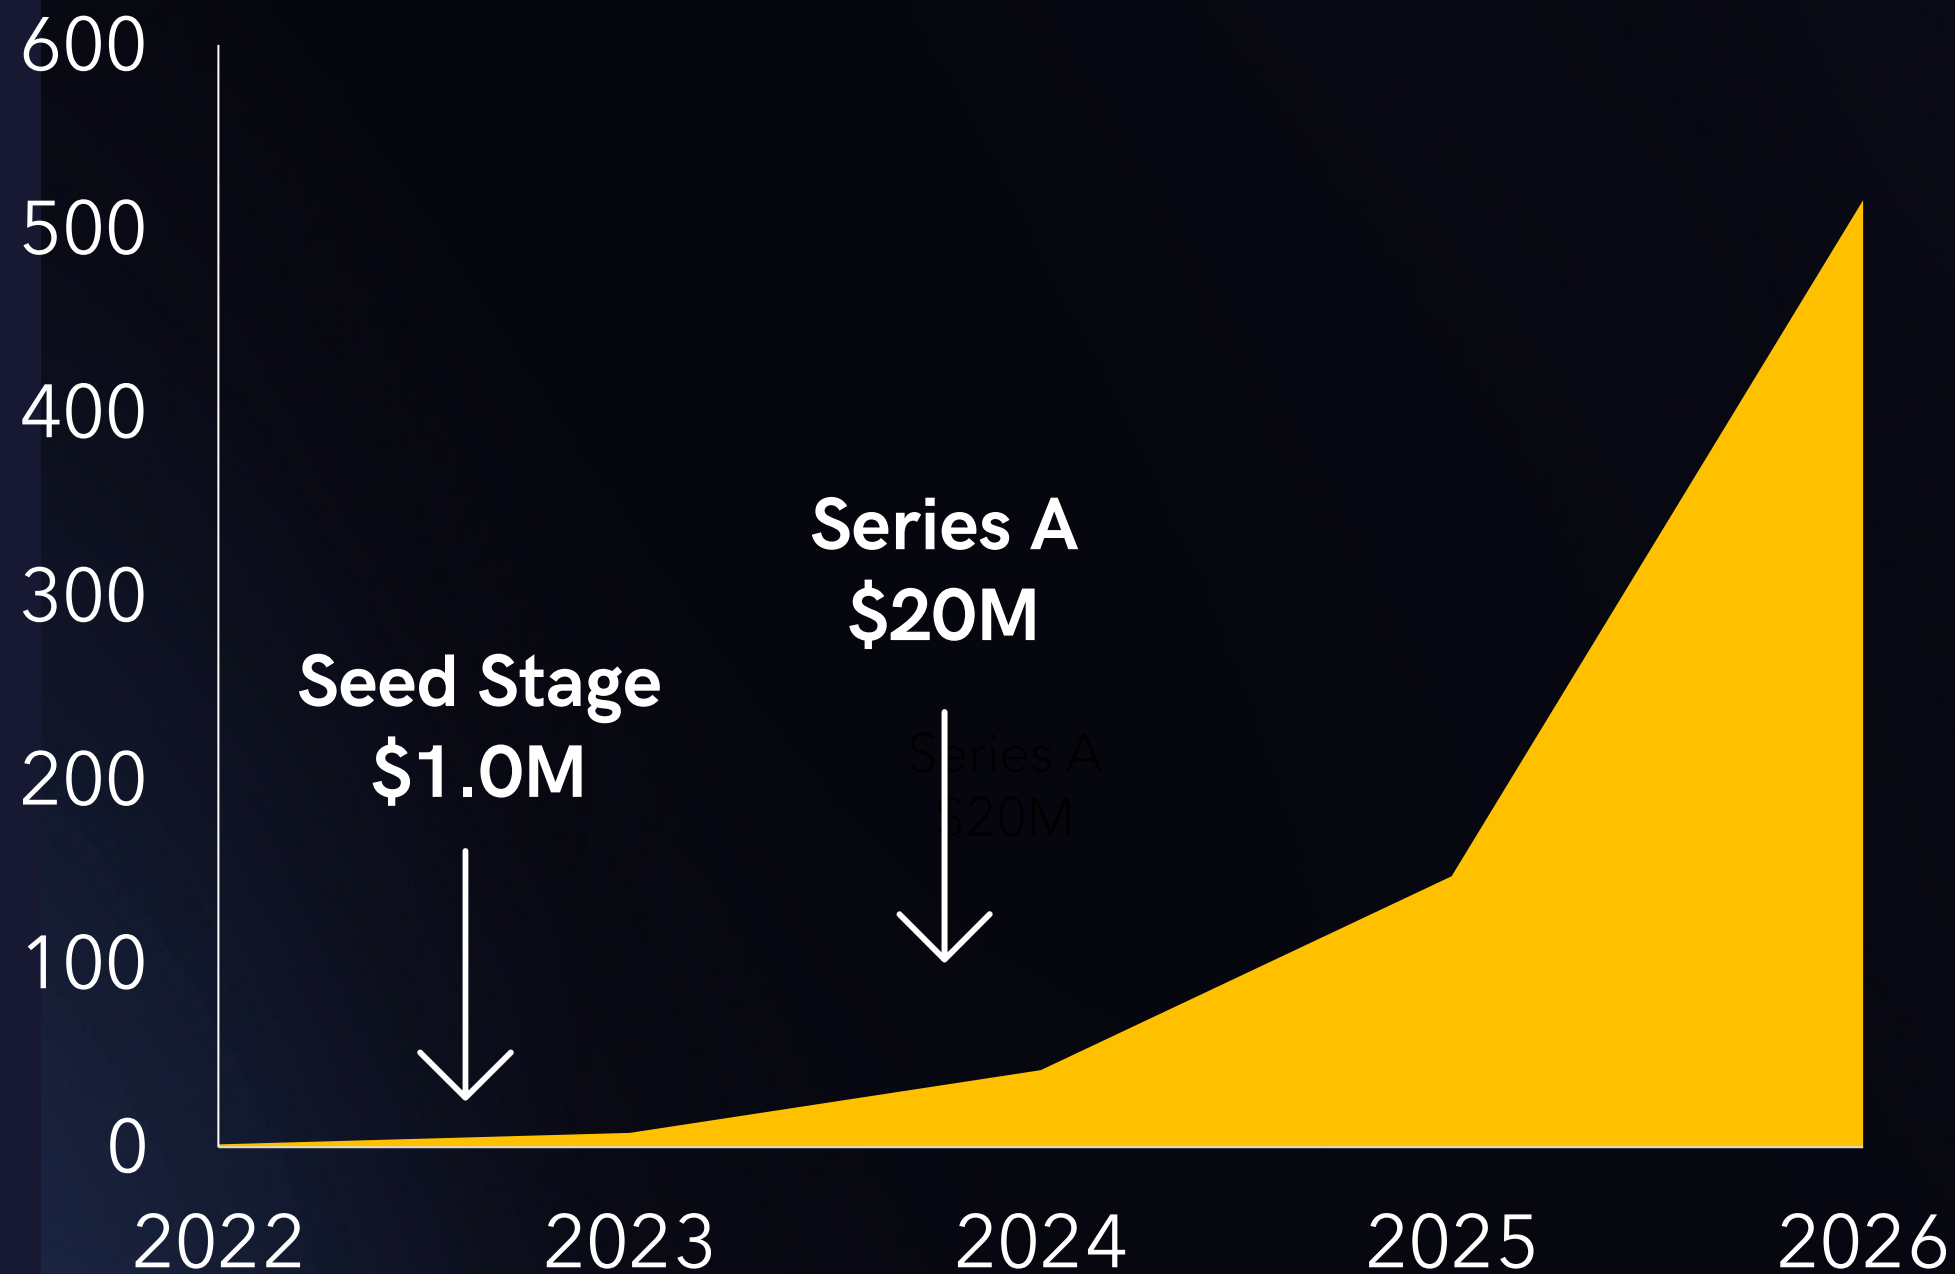

3 Access to both regulatory and voluntary markets.

4 Joint venture readiness.

5 Enhanced offset quality screening

Business Model & Revenue Projection

Revenue (Millions)

Revenue as percentage of credit value for tokenization

Transaction fees for token trading and retirement

Portion of generated credits added to DCB treasury

Market Opportunity

\$50 Billion by 2030
– McKinsey, 2021
